

ESTELON FORZA ANNIVERSARY EDITION

10 years of Estelon
10 pairs of Forza!

Estelon is excited to present the Forza Anniversary Edition, inspired by the company's 10th successful year!

The Estelon Forza, which personifies technologies trickled-down from the Extreme (Estelon's ultimate flagship model), was introduced in 2019 and has already received much worldwide recognition and numerous awards. Estelon is now releasing a special Anniversary Edition that is limited in production to a total of 10 pairs. It features a combination of Black Pearl Gloss and Gold accents highlighting its elegant curves, presenting a truly luxurious finish. Furthermore, the connectors' panel features the designer's, Alfred Vassilkov, signature!

The Anniversary Edition is now available!

Timeless Design, Powerful Performance

Each Estelon Forza speaker is a 4-way design with two woofers, one mid-woofer, one midrange driver, and one tweeter designed and produced by the premium driver manufacturer, Accuton. The two custom-made 250 mm (11-inch) aluminum-sandwich woofers can reproduce extremely deep and accurate bass, while the 190 mm (8-inch) aluminum-sandwich mid-woofer allows for fast and impactful upper bass. The 168 mm (7-inch) ceramic membrane midrange driver is ultra-light and stiff allowing critical mid-frequencies to be played without colouration or distortion while also having a linear response. The 25 mm (1-inch) diamond tweeter, which can also be found in the dashboard of the Bugatti Chiron supercar, can reproduce sounds at the highest frequencies, up to 60 kHz, with no distortions in the human hearing range.

Estelon Forza's unique shape and soft curves of the cabinet eliminate the effects of reflective diffraction, while the frequency characteristics of the dispersion remain straight and linear not only in front of the loudspeaker but also at various angles. This widens the ideal listening position. The combination of the curved cabinet walls and specific interior chambers eliminate cabinet vibrations so the audio signal remains pure and will only come from the driver elements. The staggering 150 kg (330 lbs) weight of each speaker gives both reactive and dynamic stability, which supports the acceleration and transient attack from the driver membranes and provides increased dynamics and micro-dynamic details in the sound.

The Estelon Forza, as its name suggests, is full of unimaginable refined power. As the electric current passes through the drivers, the Forza becomes alive. Every nuance dances through the air, creating a realistic soundstage and filling the listener with rich emotions. You can just close your eyes and enjoy the best that music can offer.

Check the availability of the Forza Anniversary Edition with your local dealer/distributor.
